

REMARKS

This paper is responsive to an Official Action that was issued on November 24, 2004 in this case. In the Action, the Office allowed all 22 originally-filed claims, but had a couple of formal objections. In particular, the Office alleged that the title of the application was not descriptive and required a new title. Furthermore, the Office noted certain informalities in the drawings.

In response to the Action, application has amended the Title of application to:

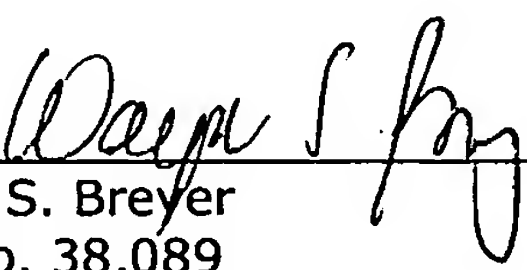

"Micromechanical Resonator having Short Support Beams"

This new Title is more clearly indicative of the claimed subject matter. Furthermore, the applicant has provided a set of Formal Drawings to replace the originally-filed informal drawings. In addition to now specifying that Figures 1, 2, and 3 are "Prior Art," the Figures have been re-drawn, thereby replacing the combination of hand-drawn and copied view graphs that composed the previously-submitted informal drawings.

Conclusion

It is believed that this case is now in condition for allowance. If any re-issues remain before a Notice of Allowance can be issued, the Examiner is requested to phone the undersigned to expedite prosecution.

Respectfully,
DeMont & Breyer, LLC
